

Catheter Rack

Ideal CaThrac - An "Ideal Solution" for today's Healthcare Market

Catheter Storage

Many Healthcare facilities worldwide are looking for new and improved methods of organizing their surgical supply areas. This is especially true in today's catheter labs.

The significant amount of catheter sizes and packaging techniques has made organizing and managing this critical area an extremely difficult task... at least up until now.

The **Ideal CaThrac** accommodates catheter inventories with ease. This innovative unit extends out towards the user, providing easy access to items organized on its adjustable hooks. Once an item has been retrieved, the mechanism can just as easily be retracted and shifted out of the way. Simply put, it's there when you need it and out of your way when you don't!

The **Ideal CaThrac** is readily available in a number of standard sizes and powder coated finishes that simply adapt to your existing storage system. Any custom requirements? We can do that too! **Ideal CaThrac** can be easily integrated into new or existing 4-post style shelving.

If you've been constantly searching for a more efficient method of storing catheters, your search is finally over. It's the **Ideal CaThrac**... just what the Doctor ordered!
